It will be in the recollection of our readers that in opening the present session of Parliament in Great Britain it was announced from the Throne that the Government would be enabled to dispense with the exceptional powers-the suspension of the Habeas Corpus Act in Ireland. The abortive and ridiculous attempts at insurrection at Chester and Kilkenny called, however, for a continuance of the extraordinary powers with which the Executive were invested. The discussion in Parliament brought out the whole truth relative to this movement. The without this security the present or prosperity of Ireland. Never were baser motives on the part of any persons undertaking to be robels and insurgents than those which impelled the instigators of those outbreaks. It was excited by those who came from abroad, and who had speculated and ple of Ireland. In the United States great sums have been collected on the pretence that "Ireland was to be freed," and that the "Irish Republic" was about to be established; and advantage was taken of the panic ereat d at one time in Canada, at another in Ireland, to make fresh demands upon the unfortunate dupes who gave their money, hoping that this great revolubut in reality only for the purpose of filling the pockets of those who practice on their credulity. There is but one feeling about the men engaged in this conspiracy—that they are mean and despicable and their motives sordid. It has been called, to a certain extent, a military movement; but its military exploits have been wholly null and void. The leaders are hardly ever seen; the reputed leader has, ever since the 28th of October, been in hiding, and even in the midst of the large population of the United States which is known to sympathize with this movement, he has not dared to show his face. There has been no particular skill or ability manifested on the part of those engaged in the conspiracy, but it has been difficult to obtain that amount of information which is usual when such designs are leadership of the Liberals. intended, from the fact that the leader and principal organizers of the conspiracy have never been Ireland, that they carry on their plots in foreign lands; all they appear to have done is to issue orders to their sympathizers, agents and dupes. PARIS, April 4-A war with Prussia on he Luxemburg question is beginning to be regarded as imminent. The action of Bismarck and the proceedings in the North German Parliament have greatly intensified the anti-Prussian feeling, and it is felt that any backing down on the part of France would be humiliating. Increased activity is manifest in all branches of the army and marine, and the Bourse is beginning to evince symptoms of a panic.

LONDON, April 4-From the Continent it is stated that extensive warlike preparations ere going forward, both in Prussia and oward the frontier. In all parts of Germany the determination is expressed to resist any alienation of German territory to France, and the action of Bismarck is warmly indorsed. No disease is more agonage than their matism; none more difficult to relieve; yet a case which, for thirty yeers, had buffled the Faculty, has, it appears, been completely cured. The particulars are given, with expressions of astonishment at the result, in many of the western journals. They state that John Roche, of Cleve-land, Onio, aged fifty-six years, had, for the greater par-of his life, endured torments of the most terrible de-scription. His limbs had been racked, and contorted by pain and muscular coditractions, until his knee-joints were of the size of a main's head, and his fingers knotted scription. His imms had been racsed, and concerned by pain and mescular collectractions, until bis kneedomis were of the size of a man's head, and his fingers knotted and draws up, until they resembled the claws of a bird of prey more than buman hands, while a seroditions tendency in the blood was indicated by blotches and pustules on various parts of his bedy. In this sire condition he began to use Bristol's Sugari-conted Pills, in conjunction with that great antidote to the virus of scrofish. Bristol's Sursapavilla. Eleven vials to the Pills, and egat bottles of the saraparilla, releved him from every vestige of pain; and, although his limbs and joints have been only partially relaxed (for they were beyond absolute cure), he is now well, cheerful and able to attent to his business. The Pills are put up in glass vials, and will keep in any ellinate. Both medicines are obtainable of all druggless.

The Tariff of Charges

Which they now submit to the public—considered with reterence to the cost of material and labor—is lower than in any other part of the world, and secures to the ming interest of this cost an important like case in both the mining and commercial value of bullion. Their charges hereafter will be as follows: Brushes and Brooms, of all kinds

For Assaying Deposits for Unparted Gold Bars.

One eighth of one per cent (heretofore a quarter) for a amounts over \$1.600, and two dollars for an smaller sum. Returns made in twenty-four hours. For Assaying Deposits for Unparted Silver Bars.

Two dollars for the gold contained, up to \$1,000, and one-eighth of one per cent for all amounts over that sum, and one per cent on the silver contained. Returns made in twenty-four hours.

For Refining Deposits made for Coin or Fine Bars.

On bullion under 300 parts gold, 2 cents per ounce. On bullion from 300 12 @000 parts gold, 4 cents pe unce. On bullion from 6001/2@750 parts gold, 6 cents per unce. On bullion from 750%@949% parts gold, 8 cents per ounce.

Above 950 the only charge will be for coinage. But there will be no charge for reflaing less than two dollars.

For Coining Gold.

This charge will be the same as at the mint—a half o one per cent—and which is paid by us to that institution But there will be no charge in tuture for making fine gold or silver bars from builton refined by us. Returns in Coin made in Forty-eight Hours. Silver contained in deposits for coin will be accounted for at the same rate customary at the Mint.
Gold bars of other Assayers in good standing, will be cashed by as at the highest market rates.
Dust and builton can be forwarded to us from any part of the country, and returns made through Weils, Fargo & Co.'s Express.

Charges at U. S. Branch Mint.

For the convenience of those not familiar with the erms of the Mint, we subjoin the tariff of charges now in orecat that Institution: For rething bullion under 300 parts gold, 3 cents per unce. For refining bullion from 300% @600 parts gold, 5 cents er ounce. For refining bullion from 600% @750 parts gold, 7 cents er ounce. For refining bullion from 750%@850 parts gold,11 cents er ounce. For refining bullion from 8501/2@9491/2 parts gold,14 For refining bullon from congression, parts gold, its cents per ounce.

The charge for coinage is one half of one per cent, and the charge for making fine silver bars, the same.

Comparing the net value of deposits for coinage, with the proceeds of unparted cold bars sold in the market—assuming that the bars have cost 1/3 of one per cent—they must be sold at the following par rates to equal the return which would have been made had they been deposited for coinage:

830 par to equal Mint return, at refining charge of 14 cents.

ents. 845 par to equal Mint return, at refining charge of 11 eents. 865 par to equal San Francisco A. & R. Works return at refining charge of 8 cents. m18, 2p3m To Merchants & Others.

The Last Performance of the Season

The performance of Wednesday evening by the Victoria Amateur Dramatic Club. although not the most successful, was quite up to the standard of amateur entertainments generally in other places, while it fell somewhat behind, in point of excellence, the two previous performances of our club. Perhaps in no city of equal size in the world will be found the same number of gentlemen drawn from ordinary business pursuits and associated together with the charitable object of ameliorating the condition of their fellow men, who can make as favorable an impression or deservedly win the enconiums that were bestowed upon the amateurs who made their last bow for the season on Wednesday evening. The entertainment commenced with the delightful domestic drama of " Our Jenny," in two acts -Country and Town. The first scene is laid in the country. The homespun dresses and simple, honest manner of the rustics were really charming. In this act Miss Arnot was very successful in her personation of "Jenny Bell," a country girl, supposed to be an orphan and living with a kind benefactor. Dame Hurdle (R. G. Marsh). Jenny was desperately in love with Alfred Emmet (Mr Godfrey Brown), who returned the passion with interest: but influenced by the stern, matter-of-fact father, a miller (Mr B. P. Griffin), was induced to give her up and go to London in search of a rich wife, greatly to the disgust of Tom College (Mr H. Rushton), a harum-scarum medical student, who espoused the cause of Jenny and gave Master Emmet and his speculative father a piece of his mind, which the old miller returned with compound interest by calling College "a scapegrace." Giles Frecklelace (Mr Callingham) was a country lout, brimful of honesty and good humor, except when he saw Jenny ill-treated, when, " like a lion in his wrath," he had to be held by Tom College to prevent his committing an assault upon the Emmets. Augustus Codaleson (Mr Charles Clarke) was the spoiled child of

and many others are preparing for a start. Nearly every man in the valley whose business is such that he can go, has either gone or is making preparations to go. These mines are much more extensive than his mother (Mrs Marsh), who granted him everything he whimed for and a little more at first thought. There have already been good prospects found over sufficient ground besides. Mrs Coddleson was a woman of for at least fifteen hundred claims, some fortune, and while on a visit to the country state more (this is one creek). The gold is became struck with the appearance of Jenny rather coarse, and about the quality of Bell and offered her the position of com-Kootenai gold. These mines have a great panion, and poor Jenny, having just had her advantage over many other new mining heart torn by young Emmet, and glad of a camps, from the fact of their easy access. change of scene, accepted the offer. Scrofula, or King's Evil.

is Constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by the veneral infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, cruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous consplaints, but

tion, which geners in the blood, depresses in energies of life, so that serofulous complaints, but they have far less power to withstand the attacks of other diseases: consequently, vast numbers perish by disorders which, although not scrofutous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, ariso from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from the blood and the rescue of the system from the blood and the rescue of the system from the blood and the rescue of the system from the blood and the rescue of the system from the blood and the rescue of the system from the blood and the rescue of the system from the blood and the rescue of the system from the blood and the rescue of the system from the blood and the rescue of the system from the system from the system of th

der from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISEASES, ST. ANTHONY'S PINE, ROSE, or ERYSIPELAS, 'PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER, and SALT RIBEUM, SCALD HEAD, RINGWORM, RIBEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROISY, DYSPEIFSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITILATED OR LIPUTE BLOOD. The popular belief in "impurity of the blood," is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without w'th sound health is impossible in contaminated constitutions.

REPORT.

From 1st January, 1866. to 31st March, 1867.

The committee are happy to report that, notwithstanding the depressed circumstances of the times, they have continued to extend the benefits of the Institution to the sick and afflicted. Since the last Report nine patients have been admitted; one has died, and eight have been discharged convalescent. have been discharged convaiescent.

In order, however, to enable them to do this, they have been compelled to reduce the allowances to their efficient nurse and matron,

sure, Commissions, Profits, and all Marine and Inland Navigation, Risks

this, they have been compelled to reduce the allowances to their efficient nurse and matron, Mrs. Ford, during the periods when there are no patients in the Infirmary.

It will appear from the Treasurer's report that the total contributions have amounted to \$1320, while the total expenditure on behalf of the patients has fallen short of \$1050. It is obvious, therefore, that, but for the debt which presses upon the institution, there would have been a considerable balance to its credit. The committee view this as an encouragement to persevere in this benevolent work.

To guard the institution against needless expenditure, paying patients have been required to make some payment in advance, as this duty is sometimes forgotten after the benefits have been enjoyed. It is pleasing, however, to notice more than one case in which, without any engagement, discharged patients have testified their appreciation of the blessings they have received, by becoming liberal contributors to the funds. liberal contributors to the funds.

liberal contributors to the funds.

A series of lectures and concerts, under the auspices of the Bishop and Mrs. Hills, has netted upwards of \$230 towards the liquidation of the debt and of the interest thereon, which now amounts to \$772; but it is hoped that the vote of \$250 made some time ago by the House of resembly will be paid by the Government and assist to relieve the Institution of this burden.

Government and assist to reneve the Institution of this burden.

Mrs. Seymour has kindly consented to become a Patroness of the Infirmary.

In conclusion the committee would thank
the subscribers and donors for their benevolent liberality; and here they would not fail to lent liberality; and here they would not fail to mention the great obligation which the subscribers, patients, and managers, are under to the careful attention of the medical gentlemen who have given their valuable and gratuitous services to the charity. They would express their firm belief that an institution which extends its benefits to all, without respect to nationality or denomination, will not be suffered to languish for want of funds. They would still appeal to the women of this colony fered to languish for want of fluids. They would still appeal to the women of this colony not to look coldly on a work which is so calculated to conduce to the comfort and elevation of their sex. The managers may sometimes feel a difficulty in drawing a line as to the cases which deserve admission, but they believe that the subscribers will fully bear these out in the view that while they should them out in the view that, while they should guard the Institution against being made the starting point for a fresh career in vice, they should never turn away a poor perishing out-cast, by whatever causes her affliction may have been produced.
